Abdellah DLIMI

Engineering Student — Big Data, Data Science & AI

Phone : +212 631862896 | Email : dlimi1abdellah@gmail.com
Location : Agadir, Morocco
LinkedIn : Abdellah-Dlimi | GitHub : AbdellahDlimi

PROFILE

Final-year engineering student at ENSA Agadir, specializing in Big Data, Data Science and AI. Seeking a final-year internship (PFE) in Data Engineering, Data Science or AI, available from February 2027. Practical experience with ETL pipelines, distributed processing, databases, data analysis, and AI applications (Machine Learning, DL, computer vision). Motivated to build scalable, business-oriented data solutions.

SKILLS

Languages: Python, SQL, PL/SQL, R, Java, JavaScript, Matlab, C
Data Engineering / Big Data: Apache Spark, PySpark, Hadoop, HDFS, MapReduce, Kafka, Docker
ML / AI: Scikit-learn, PyTorch, TensorFlow, Keras, OpenCV, FastAPI, MLflow
BI & Databases: Power BI (DAX), Talend PDI, MySQL, Oracle DB, PostgreSQL, MongoDB, Neo4j, ArangoDB, Cassandra
Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

TrustPool — AI-assisted P2P insurance SaaS — Tasmim Web
PFA Internship (July–August) · 2026–2027

FastAPI, React, Kafka, PostgreSQL/pgvector, Neo4j, Stripe, Gemini — Team of 2

- Designed an event-driven architecture (Kafka, PostgreSQL, Neo4j, MinIO) with dynamic Bonus-Malus pricing, dual treasury, and Stripe payments.
- AI layer: fraud detection (OCR + Neo4j collusion graph + scoring), explainable group recommender (cosine similarity), and multilingual RAG copilot (Gemini + pgvector).
- Zero-knowledge KYC (Fernet/KMS), JWT/RBAC, immutable audit log; React dashboards, 37 Pytest tests.

Internship Management Platform — SRM Souss-Massa
Internship (July) · 2025–2026

Python, MySQL, SMTP

- Developed a complete application management platform (submission, real-time tracking, administrative validation) using MVC architecture.
- Secure authentication (bcrypt), automatic PDF generation, SMTP/Gmail notifications, and admin dashboard with status filtering.

PROJECTS

VibAE-Monitor — Predictive Maintenance using Autoencoders
Team project (5) · June 2026

PyTorch, FastAPI, MLflow, CWRU dataset

- 2D CNN autoencoder (STFT spectrograms) for vibration anomaly detection, coupled with a fine-tuned DenseNet121 classifying 10 faults (97–99% accuracy). Real-time FastAPI + Plotly dashboard with PDF reports and MLflow tracking.

Transport Data Warehouse — Data Mining Project
2025–2026

Talend PDI, AWS RDS, Power BI

- Star-schema data warehouse (2 000 trips), Talend PDI ETL pipeline, statistical analyses (ANOVA, correlation, regression), and two Power BI dashboards with 24 DAX measures.

Library Management System — Database Project
2025–2026

Oracle DB, PL/SQL

- Merise modeling, advanced PL/SQL (packages, procedures, 40 triggers, RBAC), FastAPI backend and TypeScript/React interface for complete management (users, catalog, loans, fines, statistics).

EDUCATION

National School of Applied Sciences (ENSA), Agadir
2022–Present

State Engineering Degree — Big Data, Data Science & AI

Al Nahda High School, Oued Teima
2019–2022

Baccalaureate in Physical Sciences — Highest Honors

LANGUAGES & CERTIFICATIONS

- **Languages:** Arabic (native) — French (B2) — English (B2)
- **Certifications:** Advanced Python (Datacamp, Udemy, 365 Data Science) · Intermediate R & Excel (Datacamp)
- **Soft skills:** analytical thinking, teamwork, communication, initiative, creativity, leadership
